

Technical Data Sheet of

Granular humate

Feature

- Improve absorption and utilization of microelements and trace elements, stimulate plant root growth, increase plant resistance ;
- Improve soil structure, improve soil water holding, fertilizer holding and ion exchange capacity;
- Prevent soil nutrients from leaching or locked soil, fix heavy metal in soil , prevent soil pH change drastically;
- Stimulate vigor of soil microbes.

Physical Data

- Appearance black granular
- pH 6-8
- particle size 2-4 mm

Guaranteed Analysis

- Humic acid 30%
- Moisture 10%

Recommend application

Soil application Activate soil ,75kg/ha. be used with other fertilizer
